# About the IM011-1112 study

---

The purpose of the IM011-1112 clinical research study is to better understand the efficacy and safety of the study drug in patients with psoriasis that involves the palms of the hands and/or soles of the feet (non-pustular palmoplantar psoriasis) or the genital area (genital psoriasis).

## You may qualify to participate in this study if you:

- Are 18 years of age or older
- Have been diagnosed with non-pustular palmoplantar psoriasis or genital psoriasis for at least 6 months
  - Your psoriasis must be stable, meaning no significant flares or changes in your condition for the last 6 months
- Have typical plaque psoriasis in other areas of your body
- Have moderate-to-severe plaque psoriasis on your whole body
- Did not respond or are intolerant to at least 1 topical therapy

*The study doctor will also check additional eligibility requirements.*

## What else should I know?

If you decide to take part in the study, all study-related drugs and procedures will be provided to you at no cost. Participation is voluntary and you would be able to leave the study at any point without penalty.
