

Does your child have warts that just won't budge?

**Virginia Clinical Research may have a study
Children ages 12-17 with 1-8 warts may be eligible for a
clinical research opportunity investigating a topical patch
for wart treatment.**

They may be eligible if:

- **They have 1-8 warts, not on the face, palms, soles of feet, or groin**
- **Their warts have been present 6 months - 2 years**
- **Their warts have not been treated more than 3 times by a professional**

**If you or someone you know
is interested, contact us!**
