

TOGETHER-PsO

A clinical research study for people with plaque psoriasis and obesity or overweight.

The persons depicted in this advertisement are models and the images are being used for illustrative purposes only

TOGETHER-PsO is a clinical research study from Eli Lilly and Company. It is testing if 2 investigational medicines (medicines being studied) may help treat people with plaque psoriasis and obesity or overweight.

Can I join this study?

Yes, you may be able to join the research study if you:

- Are 18 years of age or older
- Have been diagnosed with moderate-to-severe plaque psoriasis for at least 6 months
- Have obesity or overweight, with a BMI of 27 kg/m² or more

BMI stands for **body mass index**. BMI examines a person's weight in relation to height. It gives a general guide on whether someone may be at risk for some health conditions.
