

Dermatology
beyond the skin

Does your child suffer from moderate-to-severe atopic eczema?

Participating in a clinical trial could be an option

Inclusion

You child may qualify for the clinical trial if they have moderate-to-severe atopic dermatitis and are a candidate for systemic therapy. The duration of your child's atopic dermatitis should be at least 12 months for children aged ≥ 6 years at screening and ≥ 3 months for children aged 6 months to < 6 years at screening

Duration

The trial consists of a 2-4 week screening period to check that your child meets all the conditions for taking part, a 16-week initial treatment period, a 36-week continuation treatment period, a long-term extension period lasting until 31-Mar-2028, and a final safety follow up period of 4 weeks.

Cost

There is no cost for you or your child related to trial participation, and reasonable travel costs will be reimbursed.

Do you or your child want to know more?

Please reach out to the clinical staff about the possibility for your child to participate in the trial.
